TubAirless® Tube by PumpArt

PumpArt System is a French based packaging engineering company with sales and manufacturing capabilities. Pumpart System developed, industrialized and distributes an innovative packaging technology, Tubairless® (aka Tubeasy®) based on the principle of a soft bag in a squeezable tube. Pumpart System was founded by Xavier Suty and Jérôme Boumso.

The new level of cleanness.

Gaplast and PumpArt launch new tube "TubAirfree®". Smart and clean solution for fluid and sensitive formulas.

Peiting|Paris, January 14, 2019: Two innovative partners, Gaplast GmbH and Pumpart System, have created a new airfree tube suitable for fluid and sensitive formulas.

TubAirfree® by Gaplast and PumpArt System.

TubAirfree® is a lightweight, squeezable and cost effective innovative packaging that offers similar features as traditional rigid airless packs: formulas preservation, easy-dispensing, 360° application, full evacuation (no waste !), shape and ergonomics retention. TubAirfree® is up-to 5 times lighter than common rigid bottles with pump.

Cap and Valve by Gaplast

- Enhanced product preservation, protecting the product at the outlet
- Improved flow and dosage control, allowing for more fluid formulations
- Metal-free dispensing system
- Clean product cut-off
- After-use disassembly possible facilitating recycling

TubAirless® Tube by PumpArt

- 95% evacuation rate, minimizing product wastage
- Easy dispensing of thick formulas
- Shape and ergonomics retention
- Flow and size control
- Cream freshness preservation
- Pump-free eco-friendly
- 360° application range
